

I listen to Air 1 or 90.1 FM and I understand you want to make some changes to the way FM radio is heard and these changes will affect Air 1. I must say I do not agree with this. Air 1 is the only radio station I listen to and it is a great benefit to myself and others. I don't think you should make any changes to the FM radio that would take this station or any station away from the listeners.
Thank You.
